

## SolarMax Energy Systems

# Restrictions on energy storage projects

## Overview

---

Are feoc restrictions relevant to large-scale energy storage projects?

Our focus here is on H.R. 1's extension and expansion of pre-existing foreign entity of concern (FEOC) restrictions for each of the tax credits most likely be relevant to large-scale energy storage projects under Sections 45Y, 48E, and 45X of the Internal Revenue Code.

How will HR 1 affect energy storage projects?

H.R. 1 significantly rolls back or repeals many of the clean energy tax credits and incentives introduced with the Inflation Reduction Act of 2022, but energy storage projects are generally not as severely impacted as wind and solar, as energy storage projects beginning construction before 2033 remain eligible for key credits.

Are storage projects eligible for ITC & PTC?

Storage projects that start construction before 2033 will remain eligible for both the ITC and PTC. Those beginning in 2025 can receive an ITC of up to 50% under 48E if domestic content and labor standards are met, though the ITC will phase out entirely by 2035.
