

SolarMax Energy Systems

Romanian home grid-connected inverter

Overview

How is grid connection regulated in Romania?

1. Overview Grid connection in Romania is mainly regulated by ANRE Order no. 59/2013 approving the public grid connection regulation (the “ Connection Regulation ”), which has already been amended twice in 2022 (under ANRE Orders no. 17/2022 and 81/2022) and will soon be amended for a third time.

What changes has ANRE made to Romania's grid connection process?

ANRE has also made several immediate changes to Romania’s grid connection processes, including new rules for financial guarantee. Previously required before concluding a connection, the guarantee is now a prerequisite for issuing any new grid connection permit above 1 MW and amounts to 5% of the connection tariff.

How many inverters are available in Romania?

It includes over 200 inverter models from 19 manufacturers, such as Huawei, SolarEdge, ABB, GoodWe, Fronius, and SMA, that are approved for grid connections to the public electricity network in Romania. The list is constantly being updated. Invertoarele din această din listă sunt declarate conforme cu Ordinul ANRE nr.

Can grid-connected residential rooftop PV systems be implemented in Romania?

The economic feasibility assessment revealed the significant potential for implementing grid-connected residential rooftop PV systems in Romania and also that the profitability of DGUs from the Northern part of the country is lower than in the Southern part.
