Russian BMS lithium battery

Overview

Does a lithium battery have BMS?

First, in the case of a complete discharge, it is possible to drain a lithium battery down to a level that it cannot recover from. However, BMS circuitry now prevents that from happening by shutting down the battery before the power drain can reach a level that will damage it. Unfortunately, not all lithium powersports batteries have BMS.

How does a lithium battery temperature monitoring system work?

Temperature Monitoring Lithium batteries are sensitive to heat. The BMS monitors temperature and can reduce power or shut down the battery if overheating is detected. 6. State of Charge (SOC) & Health Reporting.

Who makes Liotech batteries?

Liotech produces lithium-ion batteries and is considered as one of the top 10 battery manufacturers in Russia. Learn more in our article on what are lithium batteries used for. Liotech is subsidiary of RUSNANO that has a high-tech factory capable of producing large quantities of batteries for various purposes.

What happens if a lithium battery shorts?

Short Circuit and Overcurrent Protection If a short occurs or current spikes beyond safe levels, the BMS shuts down output to prevent fire, explosion, or damage. 5. Temperature Monitoring Lithium batteries are sensitive to heat.
