

SolarMax Energy Systems

Rwanda base station solar power generation home

Overview

How many solar power plants are in Rwanda?

Currently, Rwanda's total on-grid installed solar energy is 12.050 MW originating from 3 solar power plants namely Jali power plant generating 0.25MW, Rwamagana Gigawatt generating 8.5 MW, and the Nasho Solar plant generating 3.3 MW.

How many Rwandans are accessing electricity through off-grid solutions?

As a result, today, 14% of Rwandan households are accessing electricity through off-grid solution, mostly solar home systems.

Is energy access a key pillar of Rwanda's Development?

Energy access was already considered to be one of the main pillars of Rwanda's development back in 2000 when Vision 2020—a framework to guide Rwanda's development and the achievement of the aim of becoming a middle-income country by 2020, was launched (and subsequently revised in 2012) (Government of Rwanda [GoR], 2012b).

How many Rwandan households are connected through off-grid solar systems in 2021?

Circa 17.8% of Rwandan households are connected through off-grid, predominantly solar systems in 2021 (REG, 2021) which play an important role in the country's electrification strategy and the achievement of ambitious development goals.

What percentage of Rwandan homes have electricity?

Less than 20% of the population live in homes that enjoy electricity in Rwanda, which stymies development and reinforces poverty.

What can Rwanda learn from off-grid solar?

The decade of off-grid solar is a valuable lesson for the future calling for more deliberate steps towards just energy transitions for Rwandans, and as a result, a more just society at large. 1.
