Saint Kitts and Nevis Communication Base Station Photovoltaic

Overview

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

What is the standard voltage in Saint Kitts and Nevis?

The standard voltage in Saint Kitts and Nevis is 230 V. You can use your electric appliances there if the standard voltage in your country is between 220-240 V. In the UK, Europe, Australia, and most of Asia and Africa, this is the case. Manufacturers take these small deviations into account.

Does Saint Kitts and Nevis have a satellite phone system?

Saint Kitts and Nevis do not have a country-specific satellite phone system. Most satellite phones operate on their country code – calls to these satellite phones follow their own call sequence. Use the same call sequence. There is no trunk prefix (1) or area code (869) used when calling within Saint Kitts and Nevis.
