

SolarMax Energy Systems

Senegal 200MW energy storage power station

Overview

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

What is Senegal's 125 MW coal-fired power station?

Senegal's Sendou coal-fired power station, with a capacity of 125 MW, has surpassed heavy fuel oil generators as the country's most cost-effective source of baseload power. The project, which has been ongoing since 2007, is a regional success. It intends to enhance Senegal's power dependability and cost through a "Build, Own, and Operate" model.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector."

What is Senegal's largest gas-to-power plant?

The project, which is scheduled to begin construction in 2024, will be Senegal's largest gas-to-power plant, producing 360 MW from natural gas supplies. It will also run on light crude oil as an alternative fuel.

Where is tobene power located in Senegal?

Tobene – 115 MW Tobene Power is a large independent power generator in Senegal, with a 115 MW capacity, located 90 Km northeast of Dakar near Taiba Ndiaye. It contributes significantly to the country's power generation, accounting for around 10% of installed capacity and supplying over 2 million people.
