Senegal Ningjian Communication 5g base station

Overview

What is a 5G base station?

Base Station Base Station (BS) is a key component of the 5G Radio Access Network (RAN) architecture that serves as an access point for wireless connections between user equipment (UE) and the network. It consists of a radio unit and an antenna system that transmits and receives signals to and from the UE.

What is a 5G NR Network?

As defined in 3GPP TS 38.300, the 5G NR network consists of NG RAN (Next Generation Radio Access Network) and 5GC (5G Core Network). As shown, NG-RAN is composed of gNBs (i.e., 5G Base stations) and ng-eNBs (i.e., LTE base stations). The figure above depicts the overall architecture of a 5G NR system and its components.

How will 5G technology impact e-sport in Senegal?

In Senegal, the 5G technology is expected to help develop some economic sectors, including e-sport, a revenue-generating activity driven by the increasing availability of affordable mobile devices, improved Internet access, and the birth of online gaming platforms.

How 5G technology is transforming connectivity?

5G technology is revolutionizing connectivity, and the manufacturers of 5G equipment are leading this transformation. From modems and base stations to RAN, antenna arrays, and core networks, these companies are providing cutting-edge solutions. Leading vendors are offering innovative products to enhance network speed, coverage, and efficiency.

What is a standalone 5G network?

Standalone (SA): standalone networking. SA uses an end-to-end 5G network architecture, where 5G standards are used on terminals, base stations, and

core networks. SA supports a variety of 5G new services, including eMBB, URLLC, and mMTC, and is applicable to the middle and later stages of 5G network construction.

Will Senegal become a 5G country?

Senegal is poised to join the exclusive group of African nations that have already adopted 5G technology. In line with its drive to implement a successful digital transformation, the country aims to upgrade to ultra-fast internet connectivity to realize its objectives. Senegal will effectively proceed to the
