

SolarMax Energy Systems

Serbia Small Energy Storage Equipment

Overview

Will Serbia develop a solar power plant?

The Serbian government is seeking a strategic partner to develop at least five PV plants with a cumulative capacity of 1 GW/1.2 GWh and at least 200 MW/400 MWh of battery energy storage. State power company Elektroprivreda Srbije (EPS) will own and operate the assets.

How many MW of solar is installed in Serbia?

The government has formed a working group to organize the tender, select successful bids, and negotiate with the chosen strategic partner. According to the Association of Renewable Energy Sources of Serbia, the country has installed around 50 MW of solar. However, that figure is not exact, as there is no official registry at this stage.

Who owns the large-scale solar and battery energy storage project?

Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery Energy Storage Project being developed by UGT Renewables will be owned and operated by Electric Power Industry of Serbia (EPS) once completed.

What is Serbia's largest solar plant?

In April, Serbia switched on its largest solar plant, the 9.9 MW DeLasol PV project in the Lapovo, central Serbia. Serbia currently aims to deploy 8.3 GW of PV by 2024, according to a draft plan released by the government last year.
