

SolarMax Energy Systems

Serbia outdoor power supply quotation

Overview

Does Serbia have a diversified energy source?

While coal dominates, efforts are underway to diversify Serbia's energy sources, particularly towards increasing the share of renewable energies like hydro, wind, and solar power, in response to environmental concerns and global energy trends.

How much power does Serbia have?

It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community. Serbia announced plans to install new hydropower plants and two existing dams, and to rehabilitate a further 15 existing power plants totaling around 30 MW with EBRD financing.

How many wind power plants does Serbia have?

Through its fully subscribed feed-in tariff program (long-term contracts which provide guaranteed pricing to renewable producers), Serbia has contracted 568 MW of wind power plants and approximately 11 MW of solar plants.

Does Serbia subsidize coal & electricity prices?

Serbia heavily subsidizes coal and electricity prices, inhibiting competition. Recently, the Serbian government and EPS have announced ambitious plans to transition to green energy solutions and reduce Serbia's dependence on Russian natural gas.

Will Serbia build reversible pumped-storage hydropower?

Serbia has long-standing plans to construct reversible pumped-storage hydropower capacity at the Djerdap site on the country's eastern border with Romania and the Bistrica site on the Bosnian border in the west.

Why are electricity prices so high in winter in Serbia?

If, on the other hand, the production of electricity is small and demand is high, prices will increase. Therefore, the price of electricity is often highest in winter, as the need for electricity for heating is highest. Electricity spot prices in Serbia today, hour by hour. Including prices for the last 30 days.
