

## SolarMax Energy Systems

# Seychelles Electric produces photovoltaic inverters

## Overview

---

Who installs roof top solar photovoltaic PV systems in the Seychelles?

Sine 2012, ESS has been installing rooftop solar photovoltaic PV systems in the Seychelles. Therefore, we have experience with grid-tied roof top solar PV system. Also we are an approved installer by the Seychelles Energy Commission and Public Utility Corporation.

How does solar PV work in the Seychelles?

Currently, Seychelles has a net metering policy where electricity produced by your solar photovoltaic PV systems is recorded to a separate meter. PUC then credits your electricity bill at the end of each month. Further details on how solar PV works in the Seychelles please see our [Frequently Asked Questions](#) page.

How does a hybrid system work in Seychelles?

A hybrid system uses both the grid and batteries. Currently, Seychelles has a net metering policy where electricity produced by your solar photovoltaic PV systems is recorded to a separate meter. PUC then credits your electricity bill at the end of each month.

What is a grid-connect solar photovoltaic PV system?

A grid-connect solar photovoltaic PV system are installed at your premise and use the PUC electrical grid network to feedback electricity produced by your system. For stand-alone, off-grid or battery back up system PV systems which are independent of the PUC network and use battery storage see our [off-grid solar PV](#) page.

How do photovoltaic panels work?

During the day the photovoltaic panel covert the suns energy to electricity. There are two types of PV panels depending on the manufacturing process, poly-crystalline or mono-crystalline. The panels are arranged on the roof in an

array and connected to an inverter.
