

SolarMax Energy Systems

Simple distribution cabinet container base station

Overview

What is a containerised substation?

Containerised substations are constructed and tested at our factory to allow quick 'plug and play' installation and commissioning on-site. We sell and hire containerised equipment on a 'supply only' basis, or with optional on-site installation, cable works and commissioning by our own Contracting division. Looking for containerised solution?

.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.

What is a custom built containerised solution?

Discuss your requirements with our experts today. Custom built containerised solutions, available for purchase or long-term hire, are designed and built to your specification using any combination of new or refurbished transformers, switchgear and ancillary equipment to meet your exact requirements.

What is a modular integrated transportable substation?

Modular integrated transportable substations are a turnkey, engineered power distribution substation solution designed to meet the specific needs of each application and used for both temporary and permanent power needs.

What is a modular substation?

Modular substations can provide a total packaged solution – saving costs, time, space and labor when it is time for a new or replacement substation, distribution center or simply to add capacity to an existing substation. How is a mobile substation built?

.

How does a pre-fabricated building benefit a substation?

The pre-fabricated building shelters the equipment from environmental influences, thus increasing substation availability and reliability. Fences can be omitted, which simplifies permitting, while enhancing the substation's aesthetic appearance.
