

SolarMax Energy Systems

Slovakia Energy Storage Group Project

- ✓ **ALL IN ONE**
- ✓ **100Kw/174Kwh
High Capacity**
- ✓ **Intelligent
Integration**

Overview

What is Slovakia's new energy storage project?

The Slovakian project will be the first of its kind in Europe, delivering gigawatt-hour-scale energy storage capacity to capture surplus electricity from VVB's hydropower stations and dispatch it to the national grid when needed.

How long will a gas storage facility last in Slovakia?

Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagas. Another locality suitable for construction of a gas storage facility is in Ptrukša in eastern Slovakia.

How will echogen improve Slovakia's energy storage capabilities?

By enhancing Slovakia's energy storage capabilities, the project will:
Echogen's PTES solution uses an electrically driven heat pump to convert electricity into a stored thermal differential, which is later transformed back into electricity using a high-efficiency heat engine.
