

SolarMax Energy Systems

Slovenia rural solar power generation system

Overview

How many photovoltaic power plants are there in Slovenia?

The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW. Parliament and Government are in the process of adopting or have already adopted several amendments to the energy legislation related to renewable energy.

What is Slovenia's energy industry like?

Slovenia's energy companies are active in developing innovative electricity transmission and distribution solutions, while the country's energy infrastructure is among the strongest in the region. Ministry of the Environment, Climate, and Energy Langusova 4, SI- 1000 Ljubljana, Slovenia.

Does Slovenia have a good electricity grid?

Slovenia has an effective electricity grid and is pursuing opportunities to partner with neighboring countries to build and strengthen natural gas interconnections, as well as opportunities to increase access to and markets in Serbia, Romania, Bulgaria, Greece, Turkey, and the Western Balkans.

How many coal-fired thermal power plants are in Slovenia?

Slovenia currently operates one coal-fired thermal power plant – the 600 MW Thermal Power Plant Šoštanj sixth unit (TEŠ), which came into operation in 2014. In January 2022, Slovenian government adopted a national strategy to phase out coal by 2033, adopting a more ambitious timeline than was initially considered.

Does Slovenske Elektrarne own electricity?

While the gas and oil markets have made progress toward privatization, electricity production remains largely in state hands. The holding Slovenske Elektrarne (HSE) owns and manages a series of electricity production plants,

primarily hydropower and the thermal power plant Šoštanj.

Will Slovenia phase out coal by 2033?

In January 2022, Slovenian government adopted a national strategy to phase out coal by 2033, adopting a more ambitious timeline than was initially considered. The phase out of coal would include the premature closure of the TEŠ sixth unit, which has a lifecycle until 2054.
