

## SolarMax Energy Systems

# Small mobile energy storage power supply vehicle

## Overview

---

The Mobile Energy Storage Power Vehicle (self-propelled) is a truck-based solution utilizing lithium iron phosphate (LiFePO<sub>4</sub>) batteries as its core energy storage unit. It is equipped with a safe and reliable Battery Management System (BMS), energy storage converters, and an energy management system. What is Sunwoda's mobile energy storage vehicle?

Sunwoda's independently developed Mobile Energy Storage Vehicle offers application scenarios that far exceed expectations, focusing on five significant segments to provide integrated mobile charging and storage solutions for diverse scenarios:.

What are the different types of energy storage options?

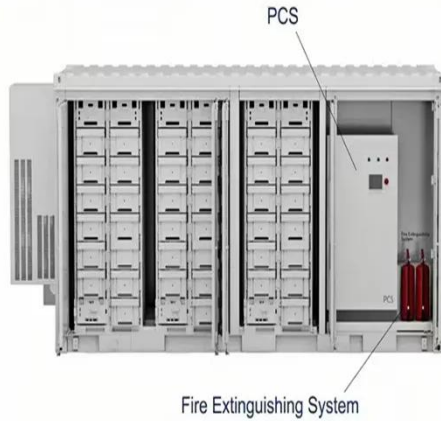

Scalable, Modular Energy Storage: Configurations range from 150kWh to 450kWh, with daisy-chaining options for extended capacity. Energy Storage Only – Providing flexible, off-grid power solutions. CCS DC Fast Charging – Featuring dual 150kW CCS chargers, suitable for high-speed public and commercial EV charging.

What are the key features & configurations of energy storage?

Key Features & Configurations Scalable, Modular Energy Storage: Configurations range from 150kWh to 450kWh, with daisy-chaining options for extended capacity. Energy Storage Only – Providing flexible, off-grid power solutions.
