

## SolarMax Energy Systems

# Small wind power generation system in Greece

## Overview

---

This Thesis focuses on investigating the potential for SWT in Greece by addressing three main research questions which regard the technological and economic potential of this technology in the country, the factors which have limited in the past and still limit their development and implementation on the built environment and support policy options which could accelerate their introduction and establishment.

## Small wind power generation system in Greece

---

### The truth about wind turbines that even Gletsos doesn't know...

In Greece, there are 3,008 wind turbines, with a total installed and operational wind power capacity of 5,326 MW, according to the latest available data.
