

## SolarMax Energy Systems

# Solar 30w water pump inverter

## Overview

---

What is a solar pump inverter?

Solar pump inverter is an essential component for powering 3-phase water pumps using solar energy. It converts the DC power generated by solar panels into AC power that can be used to drive the water pump, providing an efficient and sustainable solution for water pumping needs.

What is a 30 kW solar pump inverter?

Three-phase DC/AC 30 kW solar pump inverter, compatible with solar panels and asynchronous motors, advanced MPPT technology applied to the irrigation system. Performs normally under vibration acceleration up to  $5.9\text{m/s}^2$  (0.6g). No condensation when the RH (Relative Humidity) is less than 95%.

Which solar water pump inverter is available online?

The 5.5kW three-phase AC 220V solar pump inverter is now available online. This solar pumping inverter integrates advanced MPPT tracking for precise voltage detection and optimal performance. The solar water pumping system supports AC and DC input, with a DC voltage range of 300V~380V and a power factor  $>0.99$ .

Is a solar pump inverter a good choice?

With its advanced features and reliable performance, a solar pump inverter is an excellent choice for those seeking to harness the power of the sun for their water pumping needs. The Sunmoy solar pump inverter offers several advantages over traditional water pumping solutions and other solar pump inverters, including:

What is a sunmoy solar pump inverter?

The Sunmoy solar pump inverter offers several advantages over traditional water pumping solutions and other solar pump inverters, including: High efficiency: The Sunmoy solar pump inverter uses advanced MPPT technology

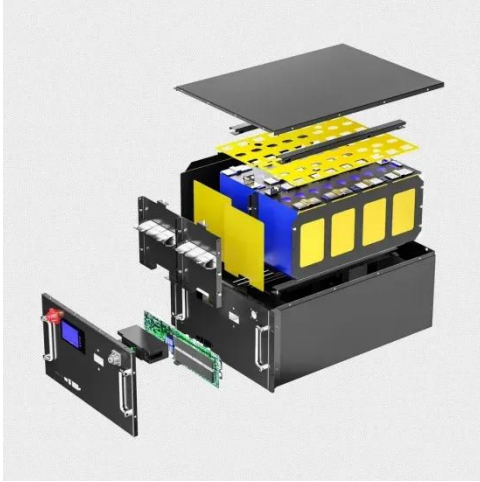

to optimize power output and maximize the efficiency of solar panels, resulting in high energy efficiency.

How much power does a solar pump inverter have?

Economic 30kW 40 hp solar pump inverter, AC output 60A at 3-phase, DC voltage range (280V, 750V).

## Solar 30w water pump inverter
