

SolarMax Energy Systems

Solar Low Power Onsite Energy Prices

Overview

Is rooftop solar a good option for a building?

Rooftop solar remains one of the most accessible and cost-effective ways to generate on-site power, particularly for facilities with high daytime energy usage. These systems can typically offset a large portion of energy consumption in a building and are relatively simple to install.

What is NREL's solar-plus-storage cost benchmarking work?

This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps required for system installation.

Are solar and wind the most competitive sources of electricity?

Solar and wind remain the most competitive sources of electricity on an unsubsidized basis in the United States, despite persistent low natural gas prices, according to a new report by US-based financial firm Lazard.
