

## SolarMax Energy Systems

# Solar household heating price

**18650** 3.7V  
Li-ion  
RECHARGEABLE BATTERY

**2000mAh**

## Overview

---

The cost of a solar home heating system typically ranges from \$3,500 to \$7,000 for installation, depending on the type and size. With the potential to cut your energy bills by 50% to 80%, these systems often pay for themselves in just a few years. How much does a solar home heating system cost?

We have all those answers here. It's common to pay around \$70 an hour for the installation of a solar home heating system. With most systems taking several days to install, you should expect to pay a few thousand dollars to have it completed. The size of the system and its complexity also helps determine the cost.

How much does a solar water heater cost?

The final cost for a solar water heater will depend on whether you choose an active or passive system, as well as the type of solar collector you use (bulk, flat plate, or evacuated tube). The price will also depend on the following: As referenced above, a solar water heater costs approximately \$9,000.

How much does a solar pool heater cost?

Solar pool heaters cost about as much as a gas heater or heat pump. Finally, we have solar heaters. Rather than using solar for a whole-home heating and cooling system, a solar heater provides additional (or sole) heating for a specific room or rooms. Solar air heaters -- or solar furnaces -- pay for themselves over the shortest period of time.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

What are residential solar heating systems?

Residential solar heating systems are designed to capture and use the sun's energy to heat your home. These systems can be classified into two main types: active solar heating systems and passive solar heating systems. Both aim to improve energy efficiency and reduce reliance on fossil fuels, but they operate differently.
