

SolarMax Energy Systems

Solar output 3000 watts

Overview

In this guide, we review the best 3000+ watt solar generators and discuss what to look for when buying one. Also check out our reviews of the best home backup solar generators for other high-output and high capacity power stations.

You can access the stored power in different ways. For AC power, there are six 120V 20A outlets and one 30A outlet in the main unit (the AC300). For DC power, there's one 24V 10A car outlet and one 12V 30A RV outlet in the AC300 plus another 12V 10 A.

Similar to the EcoFlow solar generator, the Bluetti AC300 has Bluetooth and WiFi connections that let you monitor and control the power.

The Bluetti AC300 is just as versatile as the EcoFlow Delta Pro when it comes to recharging. You have the usual three options: AC outlet.
