Solar panel appreciation rate

Overview

The average ROI of solar panels in the U.S. is about 10%. That means you'll make an average profit of \$10 for every \$100 you spend on your solar power system. Over time, a 6-kilowatt solar power system saves the typical household about \$1,500 per year or \$125 per month. How much does a solar panel cost in 2025?

1. The average cost per watt for solar panels in the United States in 2025 is \$2.94. 2. Installation costs depend on both the cost per watt and the wattage of the solar panel, influencing the upfront investment. 3. Solar panel costs have dropped from \$7 per watt in 2010 to nearly \$3 per watt in 2025, showcasing increased affordability. 4.

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

Why do solar panels cost so much?

In the realm of solar panel costs, regional variations play a significant role, with prices influenced by factors such as local incentives, installation demand, and the overall solar market landscape. Examining the data on average solar panel costs per watt across different states provides insights into these geographical disparities.

How much did solar panels cost in 2024?

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024. According to the report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at \$2.50 per watt.

How much does a 5 kW solar system cost?

The installation cost of a 5 kW solar panel system, averaging around \$15,000, represents a significant upfront investment. However, this cost is offset by the long-term benefits of reduced energy bills and environmental impact.

How much money do solar panels make a year?

The average ROI of solar panels in the U.S. is about 10%. That means you'll make an average profit of \$10 for every \$100 you spend on your solar power system. Over time, a 6-kilowatt solar power system saves the typical household about \$1,500 per year or \$125 per month.
