Solar photovoltaic panels installed in Italy

Overview

Installed capacity in Italy was less than 100 MW before 2008. Growth accelerated during 2008 and 2009 to reach over 1,000 MW installed capacity and tripled during 2010 to exceed 3,000 MW. The standout boom year in Italy was during 2011 when over 9,000 MW of solar power was added. This huge and rapid rise in installations was mostly due to the very generous "Conto Energia.

The growth of solar photovoltaic (PV) installations in Italy has surged significantly, with cumulative installed capacity surpassing the 40 gigawatts (GW) mark as reported in early 2024. In the first half of 2024 alone, Italy added 3.4 GW of new capacity, with 1.6 GW installed in the second quarter.
