

SolarMax Energy Systems

Solar photovoltaic power generation system in Romania

Overview

Solar power in Romania had an installed capacity of 1,374 (MW) as of the end of 2017. The country had in 2007 an installed capacity of 0.30 MW, which increased to 3.5 MW by the end of 2011, and to 6.5 MW by the end of 2012. However, the record year of 2013 was an exception, and new installation fell back from 1,100 MW to a moderate level of 69 MW in 2014.

Solar photovoltaic power generation system in Romania

Solar Photovoltaic Power Plant , PV plants Explained

Discover what a solar photovoltaic power plant is, how it works, its key components, and the benefits of harnessing clean, renewable solar energy.
