Solar system home costs in Senegal

Overview

How much does a solar power plant cost in Senegal?

The paired solar power plants cost \$40.77 million, providing electricity to 540,000 people at under four cents per kWh – not only the cheapest energy in Senegal but among the most cost-effective across sub-Saharan Africa.

How can solar power plants benefit Senegal?

The project estimates that more than 400 jobs in the towns benefit from the existence of the new solar power plants in Senegal. Because Senegal mainly relies on imported oil for electricity, solar power plants offer a more reliable and sustainable green energy source that costs less.

How much does electricity cost in Senegal?

As per SENELEC's (national electricity company of Senegal) current rate, the price of electricity for households in Senegal is 0.2223 USD/kWh. The electricity price for businesses is 0.3136 USD/kWh. 4 As per survey reports, nearly 55% of the population is connected to an electricity supply that worked most or all of the time.

How much solar power does Senegal have?

The availability of sunny hours per year is around 3,030 for most parts of Senegal, with annual solar radiation of 8.3 kilowatt-hours per square meter per day. 12 The annual generation per unit of installed PV capacity in Senegal is approximately 1600-1800 KWh/kWp/year. 3.

How many jobs will the new solar power plants create in Senegal?

The addition of the solar power plants form part of the World Bank Group's Scaling Solar program and are funded by the International Finance Corporation (IFC), European Investment Bank and Proparco. The project estimates that more than 400 jobs in the towns benefit from the existence of the new solar power plants in Senegal.
