Solar system home prices in Panama

Overview

Are solar panels worth it in Panama?

In conclusion, Panama's sunny climate, one of the main reasons many people move here, makes it perfect for solar energy. Solar panels for homeowners in Panama can save money, provide energy independence, and help the environment. So, they are clearly worth it.

Where to buy solar equipment in Panama?

You can buy solar equipment tax-free from local dealers in Panama. However, their stock might be a bit outdated. Purchasing directly from reputable solar companies on Alibaba or AliExpress is a better option. Shipping takes about three months, but you save around 50% and avoid importation and sales taxes with a simple application.

How long do solar panels last in Panama?

Opt for lithium-ion LiFePO4 batteries, which can last up to 10 years without replacement, unlike lead or gel batteries, which typically last only about two years in Panama's climate. Deciding whether to install solar panels yourself or hire a professional contractor is critical.

How much does a solar panel cost?

The panels cost \$345 each and the batteries are \$349 each. The 60 amps controller cost \$670, the INVERTER about \$400 Note: we did use other American made batteries that were cheaper – but eventually they all failed. Also, there are cheaper panels but the ones we buy have a 20 year guarantee.

How do solar panels work in Panama?

They are composed of numerous solar cells made from semiconductor materials like silicon. When sunlight hits these cells, it excites electrons, creating an electric current that can power Panama homes. Moreover, with a

new 48V battery and large inverters, you can also power your air conditioning, pool pumps, and refrigerator.

Does Panama have a solar system?

In addition, Panama's grid system operates on a split-phase setup, similar to that in the United States. When ordering your inverter, ensure it is compatible with this system, as different versions are available. This compatibility ensures your solar system functions effectively with Panama's electrical infrastructure.
