Sophia mobile energy storage equipment

Overview

What is Sophia storage?

Sophia is a modern transactional key-value / row storage library. It is designed as a RAM-Disk hybrid storage and is known for providing the best possible on-disk performance without degradation in time. Sophia offers guaranteed O (1) worst case complexity for read, write, and range scan operations.

What is a mobile energy storage system?

An energy storage system contains a large amount of energy stored in a small space, which may make it the target for those who look to cause harm. For this reason, a deployed mobile energy storage system is required to be provided with a fence with a locked gate that keeps the public at least 5 ft (1.5 m) away from the ESS.

Are mobile energy storage systems ready for a 2023 New Year's Day fire?

Mobile energy storage systems are being deployed in jurisdictions around the world, and—as demonstrated by a 2023 New Year's Day mobile energy storage system fire —accidents can happen. We want to make sure communities are prepared for when these systems are deployed in their backyard.

How far can a mobile energy storage system be deployed?

Additional limitations for where a mobile energy storage system can be deployed include a 10 ft (3 m) limitation on how close it can be to various exposures and a 50 ft (15.3 m) limitation on how close it can be to specific structures with an occupant load of 30 or greater.

How far away should a mobile energy storage system be parked?

However, when the mobile energy storage system needs to be parked for more than an hour, it needs to be parked more than 100 ft (30.5 m) away from any occupied building, unless the authority having jurisdiction (AHJ)

approves an alternative in advance. Deployment documents.

Are lithium-ion batteries included in a mobile energy storage standard?

It also goes on to mention that the storage of lithium-ion batteries is included in the scope of the document. The application section then limits the application of the standard to certain-sized mobile energy storage systems.

Flexible Abundant Configuration

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilizing
- Max. PV Input Current 15A, Compatible with High Power Modules
- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locates PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection
- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFD Function (Optional): when an arc fault is detected the inverter immediately stops operation
