

SolarMax Energy Systems

South Africa s new energy storage planning scheme

Overview

What is South Africa's Energy Plan?

SAREM provides a detailed roadmap for addressing critical challenges in local energy infrastructure, investment, and capacity, at a time when South Africa's electricity demand is expected to double by 2040. The plan focuses on four key pillars: Unlocking system readiness to support local demand for renewable power and storage.

Does South Africa need energy security?

11. South Africa has experienced several years of energy insecurity. Energy security is a key determinant for successful industrialisation. SAREM will address this directly by enhancing energy security at key industrial nodes, ensuring adequate power supply for renewable energy and battery storage component manufacturing.

How fast will battery storage grow in South Africa?

battery storage is similarly set to grow exponentially, to 4.7TWh per annum by 2030 (compared to about 700GWh in 2022).⁸ In South Africa, the rollout of renewable energy technologies is similarly set to increase rapidly, as the country aims to achieve energy security for all as well as decarbonise its electricity supply.

Is energy poverty a problem in South Africa?

Overall, a large share of the South African population (43% in 2013) lives in a situation of energy poverty. Similarly, most SMMEs, particularly micro and small-sized enterprises, do not have the financial resources to access renewable energy and storage technologies.

Why did South Africa greenlit 616mw in new battery storage projects?

South Africa greenlit 616MW in new battery storage projects as part of its energy storage scheme, a \$530 million investment boosting national grid

capacity and championing local industry wins.

Why should South Africa Invest in solar energy?

SAREM also emphasizes strategic development in the domestic supply chain for renewable energy technologies, including: – Solar Photovoltaic (PV): Expanding solar energy installations to harness South Africa's abundant sunlight. South Africa lies well within the global Solar belt.

South Africa s new energy storage planning scheme

2030 South Africa Roadmap

This program is the primary route to market for new renewable energy projects (South Africa's power sector is highly regulated). The lack of auction rounds since 2015 has therefore severely ...
