

## SolarMax Energy Systems

# South African Battery Energy Storage New Energy Company

## Overview

---

Independent power producer (IPP) Globeleq and investment platform African Rainbow Energy have reached commercial close on the 612MWh Red Sands battery energy storage system (BESS) in South Africa. Who is supplying battery energy storage systems in South Africa?

Source: Eskom. A Chinese green technology company has been contracted to supply battery energy storage systems (BESS) for the Oasis 1 cluster of projects in South Africa. Envision Energy announced the contract with the EDF Group, to supply three battery energy storage systems (BESS) amounting to 257MW of capacity and 1,028MWh of storage.

How will the battery energy storage initiative impact South Africa?

The battery energy storage initiative will significantly enhance South Africa's power infrastructure, alleviating grid congestion and increasing renewable energy integration. It aims to aid South Africa's low-carbon energy transition and achieve carbon neutrality by 2050 through energy arbitrage and ancillary services.

Is Envision Energy the largest energy storage system supplier in South Africa?

Envision Energy announced the contract with the EDF Group, to supply three battery energy storage systems (BESS) amounting to 257MW of capacity and 1,028MWh of storage. The company claims this marks the largest BESS order in South Africa and positions it as the first energy storage system supplier in the region to secure a GWh-scale order.

Why is energy storage important in South Africa?

Experts say that widespread energy storage is vital to expanding the reach of renewables and speeding the transition to a carbon-free power grid — this is key to helping reduce South Africa's reliance on fossil fuels as it seeks to transition to clean energy.

What will Scatec do for South Africa?

The project builds on Scatec's experience with hybrid solar and battery storage projects at Kenhardt and the ongoing Mogobe BESS project. "Dispatchable energy and robust grid infrastructure are vital for South Africa's sustainable energy future," said Alberto Gambacorta, the general manager and EVP for Sub-Saharan Africa at Scatec.

Who is the preferred bidder for Haru battery energy storage system?

Norwegian renewable energy company Scatec has been named the preferred bidder for the 123 MW/492 MWh Haru Battery Energy Storage System (BESS) project in South Africa by the Department of Mineral Resources and Energy, as part of the third bid window of the country's Battery Energy Storage Independent Power Producer Procurement Programme.
