

SolarMax Energy Systems

Southeast Asia Power Supply and Energy Storage Project

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

What is Singapore's biggest battery storage project?

Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia. The opening was hosted by the 200MW/285MWh battery energy storage system (BESS) project's developer Sembcorp, together with Singapore's Energy Market Authority (EMA).

Could Singapore sit at the 'core' of new energy grids in Southeast Asia?

Singapore could sit at the “core” of new regional electricity grids in Southeast Asia, with proposed interconnections to neighbouring countries set to bring 25GW of new renewable power and energy storage projects online. This is according to Rystad Energy, which published a report into Singapore's role in the Southeast Asian energy mix this week.

Does Singapore have a role in Southeast Asian energy mix?

This is according to Rystad Energy, which published a report into Singapore's role in the Southeast Asian energy mix this week. The report notes that Singapore already has hydropower and solar PV projects connected to Thailand and Laos, and that other connections have been proposed including other countries and technologies.

What makes ESS a reliable energy storage system?

The ESS comprises more than 800 large-scale battery units and uses lithium iron phosphate batteries with fast response times and high energy density for optimal energy storage. The system is monitored through the use of intelligent sensors and security cameras to ensure safe and reliable performance.

How will Bess help Southeast Asia reshape the energy landscape?

By providing flexible, reliable, and scalable power, BESS enables Southeast

Asia to overcome traditional infrastructure limitations and embrace a sustainable future. What role will BESS play in reshaping Southeast Asia's energy landscape?

Explore the insights here.
