

SolarMax Energy Systems

Sudan outdoor energy storage power supply

Overview

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

What are the main sources of energy in Sudan?

The main source of energy which are applicable in Sudan for rural now are solar, wind and biomass for small power supplies for households, rural electrification, communications and special applications, health centres, potable water and irrigation. Sudan is in the process of developing its comprehensive energy policy .

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in Sudan.

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report " Tracking SDG 7: The Energy Progress Report (2021) ", only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid .

Why is solar energy important in Sudan?

Solar energy is highly attractive as a primary renewable energy source that can contribute immensely to increasing energy access in Sudan. The location of Sudan as part of sub-Saharan Africa enriches the solar potential. The average temperature ranges from 28 to 39°C.

Does Sudan have a low electricity access rate?

Even though the energy access rate is low; Sudan is making progress in electrification with annual growth over more than 3 percentage points after 2010; more than 70% of Sudan's population was lacking access to electricity at that time . Table 1 below represents statistical facts about Sudan's electricity access rate from (2000 – 2019).
