Swaziland purchases mobile energy storage power

Overview

How is electricity generated in Swaziland?

A small amount of electricity in Swaziland is generated using hydroelectric power stations. Recent government energy policy has centred on increasing the domestic capacity for electricity provision, with further hydroelectric plants and a coal-fired station proposed.

How is the Swazi government advancing its energy infrastructure?

In collaboration with private entities and foreign aid programs, the Swazi government is taking crucial and necessary steps to advance its energy infrastructure and deliver power to the 17% of the population (more than 200,000 people) living without it.

Will Swaziland increase electricity prices?

Essentially, this means that in order to increase government's cash flow, a unit price of electricity in Swaziland would be increased by 15%. Recall that government also proposed to increase VAT from 14% to 15% as of 1 st April 2018.

Are solar panels a viable source of electricity in Eswatini?

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating.

How can the Swazi government re-electrify emerging economies?

Through hands-on investment and partnerships with private corporations, the Swazi government exemplifies how emerging economies can electrify their populations with cutting-edge renewable energy technology. There is still much work and foreign investment can accelerate the process.

What is the main energy source in Eswatini?

Hydroelectric power currently stands as one of the most prominent energy sources in Eswatini. The EEC operates four hydropower plants, constituting 15% of the country's electricity production and plans to bolster the existing infrastructure.
