

**SolarMax Energy Systems**

# **Sweden Summer 100MW PV Energy Storage Project**

## Overview

---

How much electricity does a 100 MW PV project produce?

A 100 MW PV project can supply more than 100 GWh to the electricity grid, which corresponds to the annual household electricity consumption of 18,000 Swedish homes. About Solkompaniet Solkompaniet is one of Sweden's leading players in large-scale solar power.

Can seasonal storage improve the environmental benefits of solar PV in Sweden?

If seasonal storage can enable a larger dispersion of solar PVs in Sweden, the environmental benefits of it will also indirectly be those of solar PVs. In the case that it is, the benefits provided by hydrogen for this purpose may prove to be positive looking over the whole system. Unfortunately, there is a lack of studies investigating this.

Can seasonal hydrogen storage increase solar PV Difusion in Sweden?

In conclusion, the idea of seasonal hydrogen storage for electricity might not be the ultimate path to increasing solar PV difusion in Sweden. However, the storage of energy in the more general sense in the form of hydrogen might very well be a driver that can facilitate an increase in solar PV capacity in Sweden.

Does solar PV contribute to Sweden's energy supply?

Despite this potential, solar PV's contribution to Sweden's 508 TWh/yr energy supply is today minimal, accounting for only 0.2 % (1 TWh/yr) of the total energy supply . For Sweden to further tap into this vast supply of energy, some challenges are apparent.

Can solar PV help Sweden achieve its climate goals?

If enabled by energy storage technologies, solar PV may become a helpful component for Sweden to achieve its climate goals. The mention of Sweden

however is not because of its climate policy but rather for its geographical and environmental context making it an interesting topic for study when it comes to solar energy.

How much peak power PV & storage capacity is needed in Sweden?

Figure 9: Estimation of installed peak power PV and storage capacity to enable 10 % of yearly electricity usage in Sweden to be covered. It can be seen from the results that 24 GWp peak power PV is needed as well as 3.46 TWh of electricity storage capacity.

## Sweden Summer 100MW PV Energy Storage Project

---

### Increasing utilization of solar PV in Sweden through large ...

Abstract: This report examines the feasibility of integrating large-scale seasonal hydrogen storage with solar photovoltaics (PV) to facilitate the diffusion of solar PV in Sweden by allowing ...
