

SolarMax Energy Systems

Swedish Su photovoltaic container

Overview

How is PV capacity collected in Sweden?

All the grid-connected PV capacity is collected through surveys sent out by Statistics Sweden, SCB, (Statistiska Centralbyrån) on behalf of the Swedish Energy Agency (Energimyndigheten) to all the Swedish grid operators .

Does solar PV contribute to Sweden's energy supply?

Despite this potential, solar PV's contribution to Sweden's 508 TWh/yr energy supply is today minimal, accounting for only 0.2 % (1 TWh/yr) of the total energy supply . For Sweden to further tap into this vast supply of energy, some challenges are apparent.

How much does a PV system cost in Sweden?

The total price was 11.70 SEK/Wp. There have been some significant changes in the Swedish residential PV market between 2020 and 2023, for example, the size of the annual market and the number and size of companies working with PV system installations.

What is the average PV system size in Sweden?

The number of systems at the end of each year, and the corresponding average system size are presented in Table 6. As seen at the end of 2023, Sweden had an average PV system size of about 15.8 kW. This relatively small system size illustrates that the Swedish PV market mainly consists of small, distributed PV systems.

What is the PV industry in Sweden?

The Swedish PV industry mainly contains of small to medium size installers and retailers of PV modules or systems. In 2021, the author was aware of 308 companies that sold and/or installed PV modules and/or systems in the Swedish market.

How much power does a PV system have in Sweden?

The official statistics provided by grid operators and collected by the Swedish Energy Agency only classify PV system sizes (power) into three ranges: 0-20 kW, 20-1000 kW, and >1000 kW. Table 7 summarises the total installations at the end of 2023 based on this data source.
