How does the energy crisis affect Switzerland?

The energy crisis is causing electricity prices to soar across Europe, including in Switzerland. But the impact on the country is very unequal because of specific characteristics of its market. I like getting to know people. My interests are politics, refugee issues and national minorities. I was trained as a radio journalist.

Why are energy prices important in Switzerland?

Swiss Federal Office of. [energiedashboard.ch](https://energiedashboard.ch):. Energy prices on the markets are an important indicator of the current market and supply situation in Europe and Switzerland. Supply (production) is combined here with demand (consumption) and ultimately results in a price for a specific energy product. There are markets for different products.

How many electricity supply companies are there in Switzerland?

The electricity supply to Swiss end customers is ensured by some 630 electricity supply companies. Many of the municipal utilities are also responsible for supplying their customers with water and gas.

How much does electricity cost in Switzerland?

The current law guarantees captive customers access to the network, the desired quantity of energy and “fair tariffs”. In 2021, the average price in Switzerland was 18.5 Swiss cents per kWh, while the average in EU countries was 22 euro cents.

Does Swissgrid charge a power reserve?

These include the hydropower reserve, the reserve power plants and the emergency power groups. The federal government has decided that these costs will be charged via Swissgrid. Swissgrid reports these costs, which it does not incur, in accordance with the ordinance on a separate «power

reserve» tariff.

How does Switzerland produce electricity?

The country's production, mainly from hydroelectric power stations, more than covers its requirements during the summer months. In winter, however, Switzerland has to import around 40% of its electricity. Suppliers have to buy energy on the European market, where prices are at record levels.
