Tajikistan 5G communication high-voltage power base station

Overview

Is Tajik launching 5G in Dushanbe?

Tcell, a Tajik operator, activated its first 5G base stations in the city of Dushanbe, after receiving a license for 3500MHz spectrum in June of last year. "The country's leading innovative operator, Tcell, presents the most high-speed network of new generation – 5G in Dushanbe," according to its website.

How fast is Tcell 5G in Tajikistan?

In addition, local news outlet Asia-Plus reported that Tcell has achieved download speeds of nearly 1Gbps, which is ten times faster than the top speed of its 4G network. Although Tcell is not the first operator to launch commercial 5G services in Tajikistan, it was investing in fibre infrastructure to support future 5G growth.

Is Tcell launching commercial 5G services in Tajikistan?

Although Tcell is not the first operator to launch commercial 5G services in Tajikistan, it was investing in fibre infrastructure to support future 5G growth. As such, the operator is offering customers the chance to win 5G devices with data allowances via its website despite not confirming commercial 5G tariffs.

What is the coverage area of 5G high-frequency base stations?

The radius of coverage area of 5G high-frequency base stations will be less than one-tenth of that of 4G base stations, and the coverage area of 5G high-frequency base stations will be less than one percent of that of 4G base stations. The deployment of macro base stations is difficult and the site resources are not easy to obtain.

What is the work difficulty of 5G network & powering solution?

work difficulty. 1) 5G Network general descriptions, cells 2) Powering solution divided into local powering, remote coverage, and impact on powering

strategy, powering and share infrastructures in three different type of 5G network and feeding solutions cases and there will be very technical specifications.
