Thailand energy storage power station subsidies

Overview

How much do Thailand's electricity subsidies cost?

Pricing information is difficult to access when vertical integration exists. a comprehensive assessment of thailand's subsidies to electricity consumers was beyond the scope of this study. the International energy agency estimated thailand's electricity subsidies at us\$5.67 billion (thb 173 billion) in 2011 (International energy agency, 2012).

Why have Thai governments removed energy subsidies?

In recognition of these downsides to energy subsidies, successive thai governments have gradually removed many price controls. In recent years, declining domestic production of energy, growing energy demand and volatile international fuel prices have focused the minds of government and the public on the remaining fuel subsidies in the thai economy.

What is Thailand's 2024 Power Development Plan?

Thailand's 2024 power development plan (PDP) aims to increase renewable energy use, highlighting the importance of BESS alongside solar panels and wind turbines. This could create new business opportunities for entrepreneurs if prices decrease or new technologies emerge for stationary batteries.

Which energy products are subsidized in Thailand?

In thailand, consumer subsidies exist for five energy products: LPG, natural gas for vehicles (nGv), diesel, electricity and biofuel blends. In the case of LPG, the government sets an ex-refinery price that is below the cost of production or acquisition on the world market.

What is Thailand doing to manage grid volatility?

Thailand is currently carrying out pilot projects for the development of an advanced grid system to better manage the grid volatility that accompanies the introduction of renewable energy. The private sector is also pursuing

opportunities to develop projects with battery energy storage system (BESS) technologies.

Does Thailand have a 5 GW Power Purchase Agreement & feed-in tariff scheme?

Since the introduction of Thailand's 5 GW Power Purchase Agreement ("PPA") and Feed-in Tariff ("FiT") scheme in 2022, the country has made significant strides towards renewable energy transition.
