

## SolarMax Energy Systems

# The benefits of photovoltaic power generation and energy storage in the UAE

## Overview

---

What are the different solar power plants & projects in the UAE?

This page provides information about the various solar power plants and projects in the UAE. Al Dhafra Solar PV is the world's largest single-site solar power plant. The 2GW Al Dhafra Solar PV plant was inaugurated in November 2023. It was built in a single phase.

What are the benefits of concentrated solar power?

The benefit of using concentrated solar power is that it can be stored for 8 to 12 hours after generation, which can help power the emirate through the night. The first phase of the new CSP project should be operational by 2021. Sourced from:.

What is Al Dhafra solar PV?

The 2GW Al Dhafra Solar PV plant was inaugurated in November 2023. It was built in a single phase. Al Dhafra Solar PV spans more than 20 square kilometres of desert and uses almost 4 million solar panels, which deploy innovative bi-facial technology. Quick facts The plant capacity is 2GW. It will displace 2.4 million tonnes of carbon dioxide.

How much excess electricity will be generated in UAE in February?

At 40% renewable share in the PV:CSP 4:1 scenario, which may be the closest to current UAE future energy plans, monthly excess electricity generation ranges from 0 in July to 2.8 TWh (i.e., 21.4% of monthly demand) in February.

How many GW of renewable electricity are there in the UAE?

At 40% renewable electricity share, which closely approximates future UAE targets, the corresponding annual hourly excess electricity values peak at 12 GW, 15.4 GW and 18.2 GW in the PV:CSP 1:1, 2:1 and 4:1 scenarios, respectively.

What are UAE renewable-based power generation scenarios?

The UAE renewable-based power generation scenarios ( Table 4) were modeled and evaluated based on widely accepted criteria, including annual primary fuel consumption (PFC), annual CO 2 emissions, annual excess electricity production (EEP), and the annual socio-economic cost of power generation including PtG.
