

SolarMax Energy Systems

The five major manufacturers in the photovoltaic panel market

Overview

What are the top 5 solar module producers in 2011?

The top five solar module producers in 2011 were: Suntech, First Solar, Yingli, Trina, and Canadian. The top five solar module companies possessed 51.3% market share of solar modules, according to PVinsights' market intelligence report. Top 10 solar cell producers.

Where are the top ten polysilicon & solar module manufacturers?

According to EnergyTrend, the 2011 global top ten polysilicon, solar cell and solar module manufacturers by capacity were found in countries including People's Republic of China, United States, Taiwan, Germany, Japan, and Korea.

What are the top 5 solar module manufacturers in 2023?

The total module shipments of the top 5 manufacturers nearly reached 300GW in 2023. The major players maintained their leading positions throughout the list. The top four were LONGi, Jinko, Trina and JA Solar, the same order as last year.

Who will dominate the global PV module market in 2023?

A total of 18 Chinese companies were selected in the top 20 list, with a total output of more than 440GW in 2023, gradually taking over the global PV module market with their unique advantages. LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year.

What are the key characteristics of global PV module manufacturers?

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: technological capability, vertical integration, international presence, and performance in the European market.

What is the future of photovoltaics in Europe?

Against the backdrop of an accelerating global energy transition, the total installed photovoltaic capacity worldwide is expected to exceed 1,200 GW by 2025. The commercial and industrial (C&I) market in Europe is expanding in parallel, with solar PV becoming a key tool for businesses to manage energy consumption and drive green transformation.
