

SolarMax Energy Systems

The function of base station emergency starting power supply

Overview

Emergency power systems are installed to protect life and property from the consequences of loss of primary electric power supply. It is a type of continual power system. Overview An emergency power system is an independent source of electrical power that supports important electrical systems on loss of normal power supply. A standby power system may include a .

Emergency power systems were used as early as on naval ships. In combat, a ship may lose the function of its boilers, which power the for the . In such a case, one or more.
