

SolarMax Energy Systems

Traditional base station power supply protection solution

Overview

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO₄) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

How do you protect a telecom base station?

Backup power systems in telecom base stations often operate for extended periods, making thermal management critical. Key suggestions include:
Cooling System: Install fans or heat sinks inside the battery pack to ensure efficient heat dissipation.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

Why is backup power important in a 5G base station?

With the rapid expansion of 5G networks and the continuous upgrade of global communication infrastructure, the reliability and stability of telecom base stations have become critical. As the core nodes of communication networks, the performance of a base station's backup power system directly impacts network continuity and service quality.

What makes a good battery management system?

A well-designed BMS should include:
Voltage Monitoring: Real-time monitoring of each cell's voltage to prevent overcharging or over-discharging.
Temperature Management: Built-in temperature sensors to monitor the battery pack's temperature, preventing overheating or operation in extreme cold.

Traditional base station power supply protection solution

Socay Protection Solution for DC-48V Base Station Power Supply

The power cable of the DC48 base station is pulled from the equipment room to the RRU of the radio frequency unit. The cable is long and easily disturbed by lightning.
