Tunisia Emergency Communication Base Station Wind Power

Overview

In its contribution towards fighting climate change, Tunisia aims at reducing greenhouse gas emissions across all sectors through reducing carbon intensity in the country by 41 per cent in 2030, relative to t.

What is wind energy in Tunisia?

Wind energy forms an important component of the Tunisian renewable energy program and targets (Ministère de l'Energie, des Mines et des Energies Renouvelables de Tunisie, 2020). (1) Large-scale projects, subject to concession (tender process): covering projects over 10 MW for solar and over 30 MW for wind, awarded via competitive concessions.

Why is Tunisia a good place to study wind energy?

Tunisia has the potential to promote research that can solve renewable and wind energy problems and prepare the skilled workforce for an expanded wind energy industry (Schäfer, 2016).

Can offshore wind power be used in Tunisia?

Offshore wind power has the potential to play a key role in achieving the future renewable energy targets due to the country favorable geographic location and coastline. However, there are currently no offshore wind farm projects nor experiences in Tunisia.

Does wind energy affect the Tunisian electricity mix?

Wind energy in the Tunisian electricity mix and the environmental aspects of wind farms were also investigated. Brand and Missaoui (2014) evaluated five power mix scenarios and concluded that best-ranking electricity mix scenario consist of 15% wind, 15% solar and 70% natural gas-generated electricity.

Is there a wind resource in the Gulf of Tunis?

Modeling and investigation of the wind resource in the Gulf of Tunis, Tunisia. In: International Conference on Heat Transfer, Fluid Mechanics and Thermodynamics. Renew. Sustain. Energy Rev., 59 (2016), pp. 1639 - 1652,

10.1016/j.rser.2016.01.076 Launches first 10 MW wind turbine in history - Energy News. Institute of energy of South East Europe.

How many wind farms are there in Tunisia?

Wind power projects currently operating in Tunisia consist of three utility-scale wind farms producing a total capacity of 244 MW of electricity (STEG, 2020). The wind farms have been installed in the north of the country as indicated in Table 4.
