

## SolarMax Energy Systems

# Tunisia container photovoltaic project bidding

## Overview

---

When will Tunisia get a photovoltaic power plant?

The government will await proposals until April 30, 2025. The capacity will be awarded under the second round of the country's AO-01-2022 call for tenders, through which Tunisia aims to find contractors for 1,700 MW of photovoltaic (PV) projects under its national renewable energy development programme.

Is Tunisia building a solar power plant?

Tunisia has commenced construction on two 10 MW solar projects in Kasserine Governorate, developed by energy firms Qair and Mazarine. In September 2024, the country also began building a 50 MW solar plant in Tozeur, a TND 135 million project led by Norway's Scatec and Toyota subsidiary Aeolus.

How much money does Tunisia need to invest in renewable power?

Figures from Enerdata suggest that Tunisia will need to invest around US\$300 million a year until 2030 to reach a threshold of 500MW of annual renewable capacity additions, if it is to hit its target of accounting for 35% of power generation with renewable power.
