

**SolarMax Energy Systems**

# **Tunisian crystalline silicon photovoltaic panel manufacturer**

## Overview

---

How much electricity does a solar system produce in Tunisia?

In other words, for every kilowatt-peak (kWp) of installed solar capacity, the system can generate approximately 1650 kilowatt-hours (kWh) of electricity per year. 2 As of March 2022, the price of electricity in Tunisia stood at \$0.07 per kilowatt hour (kWh) for households, making it an affordable option for residential consumers.

How much does electricity cost in Tunisia?

As of March 2022, the price of electricity in Tunisia stood at \$0.07 per kilowatt hour (kWh) for households, making it an affordable option for residential consumers. In contrast, businesses in Tunisia faced a slightly higher rate of \$0.10 per kWh, reflecting the differing energy demands and usage patterns between the two sectors. 3.

How much sunlight does Tunisia get per year?

There is an average of 2993 hours of sunlight per year. 1 Tunisia boasts an impressive solar energy potential, with an average annual global horizontal irradiance (GHI) of approximately 1850 kWh/m<sup>2</sup>. This abundant solar resource translates to an average annual energy production of solar photovoltaic (PV) systems of around 1650 kWh/kWp/yr.
