

SolarMax Energy Systems

Tunisian solar panel system

Overview

How much solar power does Tunisia have?

In Tunisia, the total solar PV total capacity at the end of 2014 was 15 MW which comprised of mostly small-scale private installations (residential as well as commercial) with capacity ranging from 1 kW and 30 kW.

What is the Tunisian Solar Plan?

The Tunisian Solar Plan contains 40 projects aimed at promoting solar thermal and photovoltaic energies, wind energy, as well as energy efficiency measures. The plan also incorporates the ELMED project; a 400KV submarine cable interconnecting Tunisia and Italy.

Will TuNur use concentrated solar power in South West Tunisia?

TuNur plans to use Concentrated Solar Power to generate a potential 2.5GW of electricity on 100km² of desert in South West Tunisia by 2018. At present the project is at the fund-raising stage.

How much sunlight does Tunisia get per year?

There is an average of 2993 hours of sunlight per year. 1 Tunisia boasts an impressive solar energy potential, with an average annual global horizontal irradiance (GHI) of approximately 1850 kWh/m². This abundant solar resource translates to an average annual energy production of solar photovoltaic (PV) systems of around 1650 kWh/kWp/yr.

How much does electricity cost in Tunisia?

As of March 2022, the price of electricity in Tunisia stood at \$0.07 per kilowatt hour (kWh) for households, making it an affordable option for residential consumers. In contrast, businesses in Tunisia faced a slightly higher rate of \$0.10 per kWh, reflecting the differing energy demands and usage patterns between the two sectors. 3.

What are the benefits of a solar water heater in Tunisia?

PROSOL includes a loan mechanism for domestic customers to purchase Solar Water Heaters and a capital cost subsidy provided by the Tunisian government of 20% of system costs. The major benefits of PROSOL are: Generation of employment opportunities in the form of technology suppliers and installation companies. Reduction of GHGs emissions.
