

SolarMax Energy Systems

Two-in-one outdoor power supply

18650 3.7V
Li-ion
RECHARGEABLE BATTERY

2000mAh

Overview

How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

How to choose a portable power station for camping?

Setting one up inside a home or workshop means close quarters, and loud models could literally require hearing protection. A portable power station for camping should also be quiet, or else it may disturb the neighbors. Typically, electric and solar power stations make for the quietest generators available.

Do portable power stations need a wall outlet?

Portable power stations typically come equipped with lithium-ion batteries that hold a significant amount of stored electrical energy. Most power stations plug directly into a standard electrical outlet, but many models don't require access to a wall outlet.

How many ports does a power inverter have?

This power inverter features three ports: a USB-A, a USB-C, and a standard AC outlet. It also has a built-in work light to illuminate work or a path back to the truck. Runtime will be determined by the size of the battery it's on, but with a 150-watt output, it can handle lamps, cell phones, and other devices.
