

## SolarMax Energy Systems

# UAE Energy Base Station to Container

### Power Conversion System

- Single-stage three-level modularization
- Multi-branch input to reduce battery series and parallels connection

## Overview

---

What are the major energy logistics facilities in the UAE?

These facilities include: Mussafah, one of largest integrated energy logistics bases in the UAE, and RIASH, from which logistics services are provided to more than 70 offshore locations, including nine natural and artificial islands, Borouge Container Terminal in Al Ruways Industrial City.

Do fuel storage tank systems comply with UAE Civil Defence codes?

3.8.1 Licence Holders with Fuel Storage Tank Systems shall comply with the UAE national civil defence codes and standards.

Where is the petroleum storage facility located in the UAE?

across the UAE. The petroleum storage facility based in Fujairah has a capacity of 463,000 cubic metres across 23 tanks. As an independent chemical terminal, our facility in Jebel Ali caters to the widest range of bulk liquid chemical products handled in the region, both for inland consumption and for re-exports.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site.

What is the scope of supply for containerized Mobile substations?

The scope of supply covers the complete assembly which may include: Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity.

What is a field constructed aboveground fuel storage tank?

2.1.15 Field Constructed Aboveground Fuel Storage Tank: a storage tank which is assembled and constructed on site at the relevant facility, and which operates at atmospheric pressure, with more than ninety percent (90%) of its volume aboveground and having a capacity equal to or greater than fifty thousand (50,000) imperial gallons.
