

## SolarMax Energy Systems

# UAE Microgrid Energy Storage System Prices

## Overview

---

How much does energy storage cost a microgrid?

In commercial/industrial and utility microgrids, soft costs (43% and 24%, respectively) represent significant portion of the total costs per megawatt. Finally, energy storage contributes significantly to the total cost of commercial and community microgrids, which have percentages of 25% and 15%, respectively, of the total costs per megawatt.

What is Themar Al Emarat microgrid project – battery energy storage system?

The Themar Al Emarat Microgrid Project – Battery Energy Storage System is a 250kW lithium-ion battery energy storage project located in Al Kaheef, Sharjah, the UAE. The rated storage capacity of the project is 286kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019.

What is thermal energy storage battery storage project?

The thermal energy storage battery storage project uses molten salt thermal storage storage technology. The project was announced in 2018 and will be commissioned in 2030. The project is owned by Shanghai Electric Group; Acwa Power and developed by Abengoa. 2. Mohammed Bin Rashid Al Maktoum Solar Thermal Power Plant – Thermal Energy Storage System
