UAE increases energy storage capacity

Overview

Why is energy storage important in Dubai?

“We follow the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to ensure energy security and sustainability. Energy storage is a vital aspect in ensuring energy sustainability and increasing the reliance on clean and renewable energy sources.

Which Emirates have a battery energy storage system?

Abu Dhabi, the capital emirates of the United Arab Emirates (UAE). Image: Wadiia / WikiCommons. The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC.

How has electricity capacity grown in the UAE?

Total electricity capacity in the UAE grew by almost 10 gigawatts (GW) from 2012 to 2021. About 44% of this growth was in capacity derived from fossil fuels. The remainder of the growth in capacity in this period came from nuclear and solar energy sources.

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

What is the UAE Energy Strategy 2050?

Aim of the UAE Energy Strategy 2050 The updated strategy aims to promote the deployment of renewable and nuclear energies, enhance energy efficiency, drive R&D and innovation in energy technologies, increase local

clean energy capacity, and encourage investments in the country's renewable and clean energy sector.

What are the future capacity requirements for battery energy storage system?

The recommendation was made in the 'Statement of Future Capacity Requirements 2023-2029: Summary Report' by Emirates Water and Electricity Company (EWEC), the utility for the capital emirate of Abu Dhabi. The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to utility EWEC.
