

SolarMax Energy Systems

UK Wind and Solar Storage and Charging Station

Overview

The five-year FEVER project, a £6.6m joint programme between four UK universities, will start work in September developing charging hubs that deliver green electricity from their own wind and solar farms.

UK Wind and Solar Storage and Charging Station

Wind-Energy-Powered Electric Vehicle Charging ...

The integration of large-scale wind farms and large-scale charging stations for electric vehicles (EVs) into electricity grids necessitates energy ...

- Efficient Higher Revenue**
 - Max. Efficiency 97.5%
 - Max. PV Input Voltage 600V
 - 150% Peak Output Power
 - 2 MPPT Trackers, 150% DC Input Oversizing
 - Max. PV Input Current 15A, Compatible with High Power Modules
- Intelligent Simple O&M**
 - IP66 Protection Degree: support outdoor installation
 - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
 - DC & AC Type I SPDs prevent lightning damage
 - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
 - Plug & Play, EPC Switching Under 10ms
 - Compatible with Lead-Acid and Lithium Batteries
 - Max. 6 Units Inverters Parallel
 - AFQ Function (Optional): when an arc fault is detected the inverter immediately stops operation
