

## SolarMax Energy Systems

# UK lithium battery packs by 2025

## Overview

---

Are UK batteries sustainable?

The expectation of consumers that the products they purchase are sustainably manufactured was also mentioned: 'the UK Battery Strategy should require manufacturers to demonstrate and prove the sustainability credentials of their sourcing and manufacturing practices.'

Which countries recycle lithium ion batteries?

The UK currently has an emerging capacity to recycle lithium-ion batteries, with most EV batteries being dismantled and shipped to Europe. Recyclus Group, based in Wolverhampton, 225 Hampel C. 'CATL invests €3.25 billion in recycling plant in China.' 2023. 226 BASF. 'Battery materials meet recycling.' 2023. 227 European Commission.

What is British lithium doing in 2021?

With the assistance of a Small Business Research Initiative grant in 2021, British Lithium built a state-of-the-art lithium pilot plant which successfully produces and refines battery-grade lithium carbonate.

Why is the UK a good place to buy a lithium ion battery?

The driver behind many of these innovations is the strength of the UK's research base, which is consistently ranked as best in class across a wide range of areas.<sup>86</sup> Indeed, research at the University of Oxford in the 1970s made the lithium-ion battery possible. across the battery value chain.

How big is UK battery demand?

UK battery demand is forecast by external bodies to be likely to reach over 100GWh per annum by 2030 and around 160GWh by 2035, reaching nearly 200GWh in 2040. These estimates are based on comprehensive battery models by The Faraday Institution<sup>243</sup> and BloombergNEF<sup>244</sup> which include EVs, micromobility,<sup>245</sup> and stationary storage.

Will the battery sector utilise 3% of the UK's total consumption by 2030?

APC analysis indicates that the battery sector alone may utilise up to 3% of the UK's total consumption by 2030, based on announced gigafactory capacity.<sup>190</sup> The expansion of the battery sector in the 188 Department for Business and Trade. 'Government Action to Supercharge Competitiveness in Key British Industries and Grow Economy.' 2023.

## UK lithium battery packs by 2025

### Stacking up the storage: where the UK battery market stands in ...

At present, the UK has more than 6.8GW/10.5GWh of operational battery storage. 79% of this capacity is in England, 16% in Scotland, 3% in Northern Ireland and the remaining ...
