Vietnam 5G communication base station inverter grid- connected body

Overview

Is Viettel advancing 5G communication in Vietnam?

Companies like Viettel are at the forefront in advancing 5G communication. With its 5G digital front-end SoC for base stations, developed with Synopsys ASIP Designer, design and verification tools, and IP, the company is doing its part to bring super-fast, reliable connectivity to Vietnam.

How many 5G base stations will VNPT install this year?

According to Nguyen Anh Dung, Director of Enterprise Customer Division at VNPT, the company is expected to install approximately 20,000 new 5G base stations across the country to enhance network connectivity this year. VNPT effectively deploys Smart Agriculture Solution – ONE Farm. (Photo: VNA).

Why did Viettel high tech develop a 5G digital front-end SoC?

Viettel High Tech had been working on the design of a 5G digital front-end SoC for a gNB 3GPP 5G base station. The engineering team needed to accelerate their time to market for a competitive advantage. In fact, facing a short product development window is not uncommon in this sector.

What is a 5G base station SoC?

5G base station SoCs encompass many sub blocks that are designed in fixed-function RTL. As the 5G standard was defined and requirements weren't yet standardized, designers began introducing more software programmability into the actual data-processing blocks of these designs.

Why did ASIP designer accelerate Viettel's 5G digital front-end design process?

"ASIP Designer accelerated the design process of Viettel's first 5G digital front-end SoC to save time and to achieve the desired performance," noted Le-Thai Ha, Ph.D., a principal engineer at Viettel High Tech.

What is 5G & how will it impact Vietnam?

5G enables new services like Network Slicing and AI. (Illustrative images created by AI) A study by Ericsson estimated that 5G will account for approximately 50% of mobile subscriptions in Vietnam by 2029. Currently, more than 25% of the country's data traffic is transmitted via 5G.
